Newsletter of the Seattle Puget Sound Atari Computer Enthusiasts

**Have you booted
your Atari today?**

Messages from S'P'A'C'E is the official newsletter of the Seattle Puget Sound Atari Computer Enthusiasts, (S'P'A'C'E), a non-profit Atari computer users group. The contents of Messages from S'P'A'C'E are a compilation of club news, hobby and industry news, and articles about Atari computers and supporting software and hardware. Messages from S'P'A'C'E does not knowingly reprint copyrighted materials, without getting and giving proper credit, and respects all copyrights. Original material contained herein may be reprinted for non-profit use provided both the authors and Messages from S'P'A'C'E are credited. The articles published are solely the views and responsibility of the **author(s)** and do not necessarily represent the opinions of S'P'A'C'E. S'P'A'C'E is not affiliated in any way with Atari Corporation.

ADVERTISING

New Rates!

Rates: Full page (5" x 7.5") - \$6, Half Page (5" x 3.75") - \$3. Quarter Page (2.5" x 2.5")- \$1.50, Business Card (2.25" x 1.5") - 50 cents. Cover Pages - \$14/ea. A 10% discount is given for advance purchase of 6 consecutive regular or 3 cover ads (and, if Full page in size, the desired pagelcover placement will be guaranteed). Add 10% if guaranteed page placement of single issue ads is desired.

Send:

Camera ready copy and payment by the 15th of the month preceding publication to S'P'A'C'E Attn: Advertising Manager, P.O. Box 11042, Tacoma, WA 98411-0042.

ARTICLE CONTRIBUTIONS

Please forward text files (ASCII format with line feeds and control codes removed) and/or graphics files on disk to: S'P'A'C'E P.O. Box 11042, Tacoma, WA 98411-0042. Disk submissions will be returned at meetings or via mail (if requested), so please put your name and address on the disk.

Messages from S'P'A'C'E: is produced using PageStream DTP program on Atari computers and printed on a HP Deskjet 500.

1- **What's New** (New and Improved)
from GENIE Lamp Staff

5 - **Online Library** ([*] Files, Files and
More Files by Mel Motogawa

You place SHOWTEXT.PRG in the AUTO folder. SHOWPICS.PRG and SHOWHEX.PRG run after SHOWTEXT.PRG. As a user convenience option, you can rename those programs to .SHO and SHOWTEXT.PRG will automatically run them on bootup.

ShowText installs a handler for the 'DC Shower' chain. Pics and Hex install themselves into this chain. The chain is accessible by Show-Me, UIS3.3x and others.

Show Me is the "frontend" access point for file viewing. Although, you can run each viewer from the desktop as a standalone application.

The SHOW-ME module can be run as:

* ACC

Giving you access to the 3 file view modules in any program with a menu bar

For example, a PageStream user could quickly preview a graphic or text file that they want to import.

* APPIPRG

Inserted in 'the DESKTOP.INF ■ NEWDESK.INF file as the default file viewer instead of the desktop's built in Show|Print|Cancel routine; as an installed application you can access the 3 viewers by double-clicking on a file; install as an icon on the NewDesktop for drag-and-drop operation; or configure it as NeoDesk's supplemental file viewer

* TTP/GTP - accepts a pathspec to view

SHOW-ME performs a non-recursive batch search if you specify a wildcard in the filename.

A more detailed sneak preview description will be uploaded before release.

And a demo of SHOWTEXT.PRG will also be uploaded.

>>> **WHAT'S NEW** <<<

~ **New and Improved** ~

Missouri the 'show me' state-of-the-art file viewer

In development over the past few months. To date, only a one-line mentioning in the LoadAladdin text files.

Available 1st Quarter '94.

Composed of:

- o SHOWTEXT.PRG - view text files
- o SHOWPICS.PRG - view picture files
- o SHOWHEX.PRG - view binary data files
- o SHOW ME.xyz - access memory resident show modules

For those that are wondering, yes, ShowPics and ShowHex were previously distributed as part of DC Shower. (K.GERDES, CAT2, TOP12, MSG:106/M475)

Falcon Accelerators The 32 mhz accelerator boards are now available for sale in the United States. We, ATY Computer (510) 482-3775, have the first batch in stock. We have two versions of the accelerator boards. They both accelerate the Falcon030 to 32 mhz and one of them also allow optionally add up to 32 meg TT RAM. The standard one is call Eagle Sonic 32, it can be fitted completely inside the original Falcon030 case and priced at \$459. The Might Sonic 32 is the one will optional TT RAM expansion and WILL NOT fit in the Falcon030 case. For poeple who want to put their Faclon030 in an IBM type tower case this will be perfect and prices at \$659. As of 2/6/94 we onlt have one of each version left. So call us today to order yours. (A.YU, CAT27, TOP21, MSG:18/M475)

New Atari Print Magazine Processor Direct won't just be covering the Falcon. It will cover the whole Atari line. You should definitely check it out... (S.GARRIGUS, CAT15, TOP24, MSG:68/M475)

Online Britannica The Encyclopedia Britannica (EB) is going on-line electronically.

In an article by John Markoff of the New York Times News Service published in the San Diego Union-Tribune 940208 was cited the intention to provide distribution via Internet.

Currently, the database and its software interface are being tested at San Diego State University (SDSU). Beginning in the fall, the base will be available to universities by a variety of information retrieval methods developed by Internet researchers and undergoing commercialization. Later, the data base will be available to a larger commercial audience, after the academic distribution provides testing for the electronic version.

The electronic EB, Britannica Online, being tested at SDSU uses "hypertext" links between the four components of EB via Mosaic software, developed by WAIS Inc. (Menlo Park, CA) via networked personal computers and workstations. This software was developed at the National Center for Supercomputer Applications at the Univ. of Illinois (Champaign-Urbana).

The interface displays documents and illustrations, highlights words and phrases with links to other docs by clicking on a highlighted block of text or illustration.

EB execs plan pricing the base to universities as subscription based on student population. Pricing of general commercial distribution is still being discussed but might be done reference by reference; enabled by the WAIS and Mosaic software.

Economics were the basis for EB publishing themselves rather than allying with an existing online, said EB exec Joseph Esposito, "...can't make any money licensing your content." "...many of the content providers have put themselves in a position where they're held hostage to the on-line services." At 225 years, EB is the oldest continuously published encyclopedia in the English language, and the largest revenue, \$550 million. Currently the 32 volume reference contains 44 million words and 25,000 illustrations (online: 300 million characters, 2000 illus.) Its four components are the Index, the Pro-, Micro-, and Macro- pedias. The hypertext links are only in the online

(continue . .)

version.

End info from the article. Sysops: those are my words above. Shouldn't be a copyright problem. The EB exec quotes were clipped as indicated.

EB is too large a database for current CDROM (this msg may get moved). The article makes no mention of media requirements, compression tech, specific platform for the software or other important info. I've been trying to find out something about WAIS and Mosaic, and downloaded a recent 931201 EJournal article from the DigiPub library covering digital publishing hypertext authoring and retrieval software over multiple platforms, DOS w/ & w/o Windows, Mac, Sun, etc. but no mention of Mosaic or WAIS.

Anybody know anything about this development? I may leave a post somewhere to see if any SDSU student or faculty have anything to say from experience. (M.EASTER, CAT4, TOP19, MSG:203/M475)

New BBS Package I one of three beta testers for a new BBS software package known as ForeSight. This BBS is by far the best BBS in it's class. I have been running a BBS now since July. When I first decided to try running a BBS I tried every PD, Shareware, and commercial BBS program available for the ST/TT/Falcon. I tried Triplink, Express, Forem, Turbo, Rat Soft, Transdescence, Vulcan Embassy, ST Keep and many others. Of all of the BBS systems Rat Soft is the only BBS that in my opinion competes with Foresight, and maybe at this point Rat Soft is slightly better (not much). The place where ForeSight beats them all is that it is DONATION WARE. My board is going to be one of the official distribution and support boards once the author decides to release it. Once released I will upload it to GEnie. This BBS will be FULLY FUNCTIONAL and you only have to send money if you feel like it. There will be no registration necessary if you don't want to and if you do then you can send as much or as little as you feel.

Well my main purpose for posting this message is because the author and I would like to see what your reactions are about this Idea. If you are interested in running a BBS and don't want to pay the high prices for the software then ForeSight is the answer. ForeSight has complete Ansi translation and support for IG, UBT Graphics (Freeze Dried Term needed), Ascii, and VT52. If you are interested let me know. We want to know how many people might like this software. (D.GNADT, CAT8, TOP17, MSG:82/M475)

>>>>> Well, the ForeSight BBS that I am running is called Gilligan's Island BBS and I have been running the current version for about a week now. I was running my BBS with the Authors older BBS software called UBBS. The author of this BBS is also a friend friend of Aaron Hopkins (Freeze Dried) and helped with some of the Freeze Dried stuff. Aaron hopkins has helped put together a Split Screen chat mode for ForeSight and a Full Screen message editor for Foresight.

Any way, the number for my BBS is (310)523-1644. If you call I would suggest using Ansi if you have AnsiTerm if you have Freeze Dried Term use the UBBS graphics mode (I'm not taking full advantage of this yet though.) If you call between the hours of 8:00 p.m. and 11:00 p.m. you can try calling for a chat and I'll jump in to answer any of your questions. Oh by the way, when you call for a chat the BBS will play the Gilligan's Island MOD to get my attention. It's kind of a neat little feature. I have no transfer sections at this time because the transfer section is still under developement. I will eventually compile a list of the many features the BBS has, but it will lake quite a while. The biggest plus

(continue...→)

of Foresight is the Sysop side of things. Well I don't know what else to say right now but give me a call if you want to get an idea of what Foresight is like. Oh, I don't have any Instant Graphics screens because I need a good \ Instant Graphics drawing program. If you know of one please let me know. (D.GNADT, CAT8, TOP17, MSG:85/M475)

Falcon Speed 6.2 is ready! It has some minor internal changes, but here's the meat:

1. The modem port works under DOS, at speeds up to 57600 baud.
2. Hard disk partitions mapped to DOS can now be up to 128 megabytes in size.

Falcon Speed 6.2 is available at no cost to owners of version 6.0. (COMPO, CAT30, TOP7, MSG:98/M475)

Project Gutenberg CD Disc Project Gutenberg encourages the creation and distribution of English language texts. This CD contains the electronic texts (etexts) of Project Gutenberg for 1991, 1992, and 1993 through July.

It includes classics literature, reference works, historical documents, and religious works including the complete King James Version Bible.

All the text is stored in plain ASCII, so all texts will work in most all text viewer, word processors, editors and DTP programs on the full line of Atari computers. Zipped versions of the text are also included on the Project Gutenberg Disc.

It's All Relative Software offers the Project Gutenberg disc to all Atari owners for only \$29.99, postpaid. Save \$10.00 off the regular price of the disc.

Write Randall Kopchak, 2233 Keeven Lane, Florissant MO 63031 USA.

On the Project Gutenberg disc you will find the following books and reference works:

1991 CIA World Factbook

A Christmas Carol, by Charles Dickens

A Discourse on Method, by Rene Descartes

A Princess of Mars, by Edgar Rice Burroughs

About The Iroquois Constitution

Abraham Lincoln's Second Inaugural Address, 1865

..... End

ANOTHER Great Month! I'm in awe that this month we're just a little shy of 32,000 files in the ST Roundtable File Library. Over 300 have been uploaded since last month and the quality never stops. Any Atari ST/TT/Falcon user can count on getting a steady flow of exciting new programs and information while many older programs keep getting updated. Word processing aficionados will rejoice that the formerly commercial Marcel word processor is now shareware. Monochrome monitor users will no doubt enjoy the Shocker2 game demo, a high quality offering. A GEM shell for the ever popular Lharc, now at version 2.99, is another welcome addition. Enjoy!

Any comments of my own are shown within double asterisks "***..." after the file description, in the ASCII GENie Lamp version, and also in italics in the TX2 version. (If you haven't experienced reading the Lamp in TX2 format, why not download the TX2 file viewer (file #20441) by David Holmes? You may be surprised at the versatility and power of this program, above and beyond viewing TX2 Lamp issues.)

31970 **MEMWATCH.ZIP** 36480 Find out how badly your computer's memory is fragmented with MemWatch. This is enormously useful with Geneva or MultiTOS, but MemWatch is also a great general-purpose memory reporting utility! You'll be amazed at how often your precious RAM gets split into unusable fragments. MemWatch is written in 100% assembly and uses only legal GEMDOS and AES calls. It runs as a program or accessory, in any resolution, on any version of TOS, MultiTOS, or Geneva. Use latest version of ST ZIP program to extract

31967 **ZIP24QWK.ZIP** 4224 This is a quick & dirty little utility to patch version 2.4 of ST-Zip to eliminate the annoying 5 second startup delay, which is easier (and less error prone) than trying to patch it by hand. Use latest version of ST ZIP program to extract

31966 **OMENOS#2.LZH** 6016 OMEN (Open Multitasking ENvironment) is a new graphical, compact, fast, pre-emptive multitasking operating system platform for 680x0 computer systems, including ATARI, MAC, AMIGA, and PC's with the OMEN 68331 card. The OS should be released 2nd quarter '94 (likely April) for the ATARI 1st! This newsletter introduces OMEN to interested software developers and others. Use latest version of QUESTER's LZH program to extract

31965 **SAC_EXPO.TXT** 3456 The second annual Sacramento Atari Computer Expo will be on March 12&13, 1994 at the Towe Ford Museum. Come on out and check out the latest in hardware and software for all Atari computer platforms! File can be <L>isted or <D>ownloaded.

31955 **ARJSHELL.ZIP** 22016 Includes UNARJ-ST' and a special shell program for using the program. Use this to extract those .ARJ archive files from MS-DOS land. This is _extract only-, it won't create ARJ files. Extract this archive with STZip

31954 **TEMPEST1.ZIP** 159488 This is one of the Targa format screen shots from Tempest 2000 for the Atari Jaguar! The file is a true color Targa shot. Puts the GIFs to shame! Use latest version of ST ZIP program to extract *** Several other Targa files of Tempest 2000 are in the library as files #31956 - 31964. ***

(continue ...->)

- 31953 **ZX81_693.LZH** 405888 ZX81 emulator for ST/STe/TT. Includes a whole wad of prgs to use. Very faithful version of a computer from the past. Relive history! German w/english readmø. This version is dated June 1993. Extract with latest LHARC
- 31951 **TEMPGIF1.ZIP** 95104 This file is a zip of GIF format pictures from the soon to be released Atari Jaguar Game, Tempest 2000. The file has been Zipped with ST Zip 2.4 The identical pictures will be uploaded in separate files as Targas as well, for those that prefer that format. Enjoy! *** TEMPGIF2.ZIP is file #31952. ***
- 31938 **PPRESS3.LZH** 202880 PPRESS3 is The Printing Press v.3.03 by Bernhard Artz (dated Jan. 28, 1990). This is an excellent get-this-program mono-only program that will allow you to print out Letterhead, Envelopes (with both address and return address, and a graphic!), two types of disk labels, banners, and cards. Import a variety of fonts Degas, Doodle, or the programs own .CPG picture files for your graphics (numbers included). You can cut the pictures so as to include just the portion you want to include. This file also includes a full fledged art program to create your own art! Includes drivers for 9 and 24-pin printers. Geneva and ST/STe compatible. NOTE: PROGRAM IS CONFIGURED TO RUN FROM A:\ DRIVE. *** A screenshot appears in the mono TX2 version of the GEnielamp. ***
- 31934 **MOV_CS10.LZH** 64128 The "Movies at Night" Construction Set allows you to create your own animations for use with the "Movies at Night" Warp 9 Extend-Save module (included in this archive). The Construction set loads Degas pictures, .MOV files, and .SEQ Cyberpaint animations. Animations can be saved as Degas pictures or in "Movies at Night" animation format. Also allows viewing and editing of .MOV animation files for users who do not own Warp 9. SHAREWARE from Mountain Software. Note: ST Medium or Low resolution required. Extract with latest version of LHARC
- 31928 **FRONTIER.LZH** 73344 This is a non-plyaing demo of a game called Frontier, which is the sequel to Elite. Even though you cannot play it, it does give you an idea as to what you can expect out of the game... Use latest version of QUESTER's LZH program to extract TT Compatible in Color resolutions
- 31926 **COLOUR.LZH** 105600 This is a very nice coloring program for kids. Lots of nice features. Extract and put all data files consisting of a number in a folder named COLOUR. Enjoy... Use latest version of QUESTER's LZH program to extract Written in STOS BASIC. Cannot be converted to TT compatibility. May work on STe's, but not able to verify this.
- 31912 **CLIP_PRT.ZIP** 11520 The desk accessory\program allows a "raw" text print from within a application which produces a Text clipboard file. This provides a very quick print of the text information without tying the system up printing the graphical component. Works great for programs like Atari Works. Use the latest version of STZIP to extract this file. SYSOP NOTE->TESTED on TOS 1.04/1.00 ST's.
- 31911 **1STSV_XX.ZIP** 4736 FirstSave v1.0. This accessory will automatically save your current document in the word processing program, FirstWord Plus. You simply enter how many minutes you want the program to wait between "saves" and FirstSave takes care of the rest. Only 6K in size. Use the latest version of STZIP to extract this file. SYSOP NOTE->TESTED ON TOS 1.0411.00 ST's. Supposed to run on Falcons and TTs but not tested yet.
- 31906 **SONIC32.TXT** 1280 Succesfully installed Sonic 32 in a Falcon. Also the Mighty Sonic 32 with SIMMS slots for up to 32 meg of TT ram. Call ATY

(continue...➔)

Computer (510)482-3775 for information of these 32mhz accelerator boards. This is an ASCII TEXT file that can be <L>isted online OR <D>ownloaded.

31901 **RSCARDS.TOS** 33920 This is the front end program for GENie's RSCARDS Multi-player games (Blackjack, Backgammon, Checkers, Poker, Reversi, Chess, and Bridge). For more information on RSCARDS games, type RSCARDS from any GENie menu prompt. This program requires an Atari ST with either a standard color or monochrome monitor. Tested on TOS 2.06. . This program is distributed as a self-extracting archive file - after downloading, just double-click on "RSCARDS.TOS" from the Desktop to extract. Please read the READ.ME file included in the archive for further operating instructions.

31892 **MARCEL22.LZH** 277760 Marcel Software is pleased to provide the latest version of its Word Processor--version 2.2--as SHAREWARE. If you use Marcel v2.2 regularly, you pay only a \$10 user registration fee. (The fee also gets you a free manual.) Marcel v2.2 is packed with new features like paragraph sorting and line centering, Postscript output, revamped print options, improved text insertion, to name but a few. Marcel has always had a reputation for being easy to learn and use. Now it's even easier! Requires: 512KB RAM (1MB recommended), 1 720KB diskette, and med. res. screen or better. Click on the READ.ME file for more information. Please use the latest version of Quester's LZH to extract. *** A press release only is file #31891. A screenshot appears in the color/mono TX2 versions of the GENielamp. ***

31889 **PLAY_FLI.ZIP** 4992 This FLI player operates in Full Screen, is fast and plays FLIs very beautifully. It is for Falcon and TT only in 256 color-mode. It is a TTP format. Simply drop the FLI in it. Tested with Corel Draw FLIs. Postcardware. French documentation is in fact version revisions. Not compatible with Screenblaster. Please use the latest version of ST Zip to extract

31879 **EDOS V11.TXT** 2048 This is a summary of new features in ExtenDOS v1.1. ExtenDOS is an extension to TOS that provides CD-ROM support; it is an alternative to running the CDROMnn.XFS driver under MultiTOS, or using MetaDOS. This file can be (L)isted online or (D)ownloaded for reading offline.

31872 **FMTERM1J.LZH** 43136 FM Terminal version 1.0J, GEM terminal program. Falcon only! Extract with Questor's LHARC201

31869 **DEAD_MON.TXT** 14592 There is a weak point in the circuitry of many ATARI SM124 monitors that causes many to die a premature death. The problem is especially likely to occur in monitors in which the screen has been internally adjusted for full width and height, by tweaking the internal coils and trim potentiometers. This file describes how to identify and fix the problem using superior parts. Warning: The repairs and procedures described are intended for someone reasonably experienced in both electronics and soldering.

31859 **NEWDRVRS.ASC** 1664 Information for QMI (Mitsubishi) and E/I/O (Summagraphics) tablet owners. The driver software supplied with those tablets only worked on very early ST's. If your tablet no longer works now that you've upgraded your computer, the problem is in the software and can be corrected with a new driver, guaranteed usable on your Atari system regardless of its operating system, processor speed, and graphics capability. >>>NOTE: This file contains an address change from a previous press release.

(continue ...→)

31856 **MOVIE100.ZIP** 334720 This is a desk accessory (a FEW actually -- a 68000 version and a 68020+ version) that will play .FLI and .FLC animation files. It will work in ANY resolution with any number of colors (the program will do FAST dithering -- and SCALING!!!), with the exception of those offered by special graphics cards. The 68000 version only supports up to 16 colors while the 68020+ version supports up to 256 colors. It will even play multiple animations in separate windows and MORE (read the docs)!!! Includes 3 sample .FLI animations (which HAD to be included!). Freeware from Brainstorm. NOTE: Deflated using ST-Zip v2.3.

31854 **PAINTER.LZH** 113024 New version of PAINTER from Sinister in Scotland. A neat qix (sort of) like game for color machines. This vers runs on US machines w/out hassles. Shareware! If you use Sinister Developments games then please register them, they won't write any more if you don't. Extract with latest LHARC Not compatible with the TT/030 (slows to 50Hz) Use an -lh5 compatible LZH program to extract

31853 **MULTICOP.LZH** 35712 This is "Multicopy", a disk copier that reads the source disk once and lets you make many copies. Might be good for user groups, etc. Source code included. Extract with LHARC

31852 **CN.ZIP** 4608 This ZIP file contains : CN.AD.ASC: Current Notes Subscription information WRITERS.ASC: Current Notes is looking for prospective authors. GUIDE.ASC: Current Notes basic writer's guidelines DEVELOP.ASC: Developers : Send new products & announcements to ST editor. --- Paul Lefebvre Current Notes ST Editor Use latest version of ST ZIP to extract

31849 **BKITE110.ZIP** 58240 BoxKite - Yet Another File Selector. Shareware from Germany. If you're an fsel freak you'll want to have this one too! Extract with latest STZip. All Doc's in the file are in German. A screenshot appears in the color/mono TX2 versions of the GENielamp. ***

31847 **HSN_KONV.ZIP** 49152 A German utility to convert and play sound samples. This program is not in English. Extract archive with the latest STZip.

31840 **FALCONSX.ZIP** 15744 This is a desk accessory for the Falcon which allows the hardware to be configured for such things as 8/16MHz, video vertical sync/refresh rate, audio hardware, etc. Shareware from France. NOTE: Deflated using ST-Zip v2.4

31833 **RDD31.ZIP** 87296 Revenge Document Displayer v3.10 Now supports Falcon030 and big screens. Shareware only \$10. Very fast, gobs of features. a must have. Use latest version of ST ZIP program to extract

31831 **VOLUTIL3.ZIP** 14976 Release #3: Volume Label Utility v02-01-94 Fixes problems and adds enhancements. Makes labeling disks sequential a breeze! Works as program or accessory. Works with Geneva or MultiTOS. Shareware from DataBasement Software. Use latest version of ST ZIP program to extract

31829 **CLOCK.ZIP** 24704 Display a analog clock on your ST/TT/FALCON Computer. Pure 'C' Source code included. Uses BGI graphics routines. Freeware. Please use the latest version of ST Zip to extract.

31811 **EDPAT303.LZH** 47872 This archive contains the files necessary for registered users of EdHak versions 3.00, 3.01, and 3.02 to update their program to version 3.03. Compared to 3.02, this fixes kwiksend in MultiTOS (and some other word processors), fixes problems some had using Spelling Sentry with EdHak, gets rid of "Really want to Quit?" alert, asks about saving

(continue...→)

changes when using the close button when running as a PRG or MDX, and a couple other little things. This will not work on any beta versions nor on any versions prior to 3.00. If you want to upgrade from 2.3x, the cost is \$10.00, and from earlier versions it is \$15.00. Extract with latest version of LHARC

31806 **VID_SCRN.ZIP** 109184 Earlier, I uploaded a file of frames 'grabbed' using Video Master. This file has about 12 screen captures of Video Master itself. The files are in .P11 format -- Use STZIP23.TOS (file# 29519) to decompress.

31796 **CD_ROM.ARC** 12928 This file contains an official GEnie transcript which may be reprinted only in its entirety. Jan 24, 1994 conference with major Atari CD ROM developers detailing all the latest information. This file is full of up to the minute information... useful for owners of all Atari computers. Use ARC602ST.TTP to extract. (File #13310)

31787 **SHOCKER2.ZIP** 480384 This is a shareware game from Germany that runs in ST monochrome mode, with a separate program file that runs in mono mode on the TT and Falcon. Manipulate the marble to get ahold of hearts in each level, avoiding the traps and monsters along the way. Can play in one or two-player mode, two player mode can be done via MIDI or the modem ports. 100 levels, with an extra 100 levels in two-player mode. Very stunning graphics. Extract with latest version of STZip 1 megabyte or more required. This is a stunning game! DO NOT skip levels or you it will request a code from the book. *** A screenshot appears in the mono TX2 version of the GEnielamp. ***

31786 **3D22POV2.ZIP** 51072 Upgrade of 3D2POV file converter. Now contains conversions for POV 2.0 and VIVID raytracers. Should work on all TOS machines and has been Lattice C compiled with auto FPU detection. Run program and enter nothing on command line to get full description of parameters. Also included and example JPG picture created by POV and 3D2POV converter. Enjoy! Extract with latest version of STZip

31784 **PROFILE-LZH** 77952 An superb "sysinfo" type utility. Not too fancy, but the level of detail it displays about the 'innards' of your machine is unsurpassed. Freeware from the UK Extract with latest LHARC

31782 **GBNCH330.ZIP** 97024 GEMbench benchmark speed test utility v3.30 This version has undergone some cosmetic changes and various bug fixes. Shareware! Extract with latest STZip

31776 **BTRM312A.ZIP** 305152 First full release of BinkleyTerm ST from the new author (Otto Braendli) This archive includes the Binkley program, docs, ilo drive (1.8), and optimized high speed serial routines for both MFP and SCC driven serial ports. Several changes have been made to the code including removal of all errors generated during compiling, ANSI C functions now used, etc. Use latest version of ST ZIP program to extract

31767 **LZH_299.LZH** 175872 Latest version of LHARC from Grunenberg. Now includes an English language shell that takes advantage of all LHARC features. Extract with latest LHARC *** A screenshot appears in the color/mono TX2 versions of the GEnielamp. ***

31766 **TTERM210.ZIP** 98048 Teddy-TERM v2.10 - A complete communications terminal for the Atari ST, STe & Falcon030. Now supports full 16 colour ANSI (in minimum 16 colour 640x200 screen modes) with intelligent ST med/high rez ANSI compatibility. Simple cost calculating tables allowing Teddy-TERM to automatically estimate the cost of your online session. Many bug fixes since the previous version (v2.00). Extract

(continue ...->)

with latest STZip. Sysop Note: Couldn't get it to run on the TT/030 (50Hz problem) Use latest version of ST ZIP program to extract

31754 **PGPSHL02.ZIP** 22912 This is a beta version of a GEM shell for use with PGP.TTP. Use latest version of ST ZIP program to extract

31748 **TVST15.LZH** 18944 TotalView, a text file viewer. Use latest version of QUESTER's LZH program to extract

31743 **MEMTEST.LZH** 4480 Memory tester. Tests only 512K or 1MB. Use latest version of QUESTER's LZH program to extract

31736 **AV375.LZH** 59392 Good textfile viewer. ST Resolutions only Use latest version of QUESTER's LZH program to extract

31733 **G_ORACLE.ZIP** 20224 This is the latest version of Oracle(TM), the popular STalker BackTALK script for automating GEnie. New features include : Faster downloads, better formatted messages, better menu colors. Basically, it's just BETTER. Also, Gift Of Time is now an accepted method of payment. SHAREWARE (\$15) Copyright 1994 Paul Lefebvre Software Help keep the Atari market alive -- support SHAREWARE authors! Please use the latest version of ST Zip to extract.

31728 **CS63B.ZIP** 17664 Version 6.3b of Calshow has one correction for a minor bug. Date calculations in an event's message are now calculated from the starting date of the display instead of the current date. This corrects the results of the calculation when the user specifies a starting date in a year different from the current year. (CalShow is a supplementary program that is used with Cal 6.3, a great calendar desk accessory. File #25635 CAL63.LZH.) Please use the latest version of ST Zip to extract.

31708 **BLKHOL01.ZIP** 35584 Here is the program file <only> for the arcade game BLACK HOLE which runs on the Falcon030. This fixed version runs on all TOS versions 4.0 and higher (the program file included in BLACKHOL.ZIP runs on TOS versions 4.04 and up). You must download BLACKHOL.ZIP in order to run the game, since it contains the necessary support files. Please use file 29519 to extract (Zip Archive). SYSOP'S NOTE: Unable to verify operation of this file.

31701 **HTU.LZH** 42240 "Highscore Terminal Utility" from the author of UVK. A nice little database to maintain your high scores in your favorite video games. Shareware. Perfect for Jaguar/Lynx players. Extract with latest LHARC

31700 **BOOTSIE.ZIP** 19456 Utility to write a bootsector that can display a message, make various start-up beeps, wait xx seconds for your hard drive, turn off your 68020130 cache, or run another prog. Documentation is in German but program is easy to understand. Extract with latest STZip.

31691 **LETEMFLY.ZIP** 46848 This file holds the excellent improvement for the standard GEM dialog-boxes, Let 'em Fly! Full documentation (which I've taken the liberty of 're- Anglicizing'), resource file and icons are included. Changes: movable boxes (ever have a dialog-box cover essential info you need to make a selection?), smart keyboard shortcuts, new icons, etc. Sysops Note: This file will self-extract if renamed LETEMFIY.TOS otherwise Please use file 29519 to extract (Zip Archive).

31677 **FINDER20.ZIP** 17024 Shareware ACC by Bill Aycock that will search any group of files for a text string or combination of text strings; works on ST/TT, any rez. Very handy. From the Cal 6.3 disk. -- Use STZIP23.TOS (file# 29519) to decompress.

(continue . ->)

31675 **VERSIONS.ZIP** 44928 Versions 1.0 is a simple program written in Hi-Soft BASIC 2.10. It will tell you TOS, AES, GEMDOS and other versions plus what processor a machine is running and whether it is multi-tasking. It shows how to change the name in the desk menu when multi-tasking. I have included the source so that others may use it as a 'shell' to write their own programs if they like, though many features only apply to Hi-Soft BASIC 2.10. I have also included XFILESEL.BAS which replaces FILESEL.BAS in the Hi-Soft GEM toolbox and gives the option of setting a default extension when calling the fileselector. Use STZIP23.TOS (file# 29519) to decompress.

31668 **CONN244E.LZH** 386944 CoNnect 2.44 terminal emulator: improvements over 2.20: improved online help, faster transfers, etc; still with internal xlylzmodemlkermit, VT52/VT100/VT102/VT220/Tek4014, multitasking, supports ALL ST/TT/Falcon modes, and more! Extract with latest LHARC This is a fully working demo version that expires alter 30 days.

31665 **SPLITTER.ARC** 15872 This is Patrick's File splitter/combiner utility version 042687. This program will break a large file into many smaller files and later combine them back into the original file. It transfers files up to 392822784 bytes long or creates 999 individual files. it features a 393216 byte transfer buffer. -- Use ARC602ST.TTP (#13310) or other Arc utility

31656 **BLACKHOL.ZIP** 871168 BLACK HOLE is an arcade game for the Falcon030 only (it will not run on an ST, Mega, or TT). It requires a VGA monitor and ST-compatible joystick; a hard drive and headphones or external speakers are highly recommended. Lots of high quality sound effect and music samples, and 640 X 480 256-color graphics. Freeware. This file runs fine on Falcons with TOS version 4.04. If you have an earlier version (4.0-4.3) you also need file #31708.

[*][*][*]

Sometimes files are removed from the library after we publish this magazine. In many cases, the removed file has been replaced with an updated version of that file. If you can't find one of the files listed here, there is a way to check for a newer version. Do a keyword search on the library using a word that describes the file you are looking for. Chances are, you will find a newer version of that file, or another file that meets your expectations.

Club News Update ... continued

Remember our Newsletter can only be as good as the club members wish to make it, so submit an article today. If you need something to write about there are many fine PD programs out there to write about.

Oops! sorry about our **Sub-S*P*A*C*E** meeting at Fern Hill Library in March. We got the short end of the stick. Another club got to use the meeting room even though we were schedule for the room. Fear not! we have reschedule for the meeting room and have it for the next 6 months.

If someone wishes to Demo some software or hardware at our meetings, please! see me or another club officer before the meeting.

I need Ideas from our club members on what they would like to see happen at our club meetings and what is printed in the newsletter.

..... Later, yer Prez

Directions to the Auburn Library

From both North and South on I-5 or the Valley freeway (Hwy 167), take highway 18 East to Auburn.

Take the Auburn Way South St. exit. Stay in the left lane of the exit and turn left at the signal onto Auburn Way South.

Again stay in the left lane on Auburn Way South, as the road veers left you will need to turn left onto "F" Street and then make a immediate right onto 9th Street S.E., follow 9th Street two blocks and the Library will be on the right.
